

## LIST OF APPROVED REGULATED STOCK EXCHANGES

The following announcement applies to all equity indices calculated and owned by Solactive AG ("Solactive").

With respect to the term "regulated stock exchange" as widely used throughout the guidelines of our Indices, Solactive has decided to apply following definition:

A Regulated Stock Exchange must – to be approved by Solactive for the purpose calculation of its indices - fulfil a set of criteria to enable foreign investors to trade listed shares without undue restrictions. Solactive will regularly review and update a list of eligible Regulated Stock Exchanges which at least

1) are Regulated Markets comparable to the definition in Art. 4(1) 21 of Directive 2014/65/EU, except Title III thereof; and

2) provide for an investor registration procedure, if any, not unduly restricting foreign investors.

Other factors taken into account are the limits on foreign ownership, if any, imposed by the jurisdiction in which the Regulated Stock Exchange is located and other factors related to market accessibility and investability.

Using above definition, Solactive has evaluated the global stock exchanges and decided to include the following in its List of Approved Regulated Stock Exchanges. This List will henceforth be used for calculating all of Solactive's equity indices and will be reviewed and updated, if necessary, at least annually.

### List of Approved Regulated Stock Exchanges (February 2017):
